

Subscribe to School Calendars

Never miss an important school event. You can subscribe to the Gunderson activities calendar and always know what's happening. Know about your son or daughter's class events, the "Big Test" or athletic events. You need an easy-to-use tool that not only helps you stay on top of your events but lets others in your life do so as well. No user accounts needed.

Welcome to the Gunderson iCal server.

Enjoy the View

With so many events demanding your attention, you need to expand or narrow your calendar view at the click of a button. iCal allows you to choose between viewing your schedule by day, week or month. And it's easy to find things on your calendar using iCal's powerful search feature. Just type in what you're looking for in the search field, and the matching results appear as they're found. Go to any event simply by clicking on the event name in the search results list. Or use Spotlight to search for calendar events and To Dos by summary, location, organizer, attendees and more right from your Desktop.

Keep it Together

iCal gives you a single unified window showing all of your calendars at once, so you can easily spot scheduling conflicts. Or choose to see, say, only your home events and your children's activities. Just select the calendars you want to view at any given moment.

Subscribe to Your Interests

Want to stay in the know about events that are important you? iCal can help here, too. At the click of a mouse, you can easily subscribe to any number of public calendars available on the Internet. Subscribe to our activities or athletics schedule and never miss a game or event.

How do you do this

Log on to our Gunderson Calendar page (<http://gunderson.sjUSD.org/calendars/calendar.htm>).

Click on "Calendar Subscriptions", once you are on the subscription page simply select the calendar you wish to subscribe to. For individual teacher class calendars, from the "Home" page select "Staff" from the links at the bottom of the page. Once you are on the "Teach" page select your teacher from the pull down menu. The teacher calendar links will be found at the bottom of the page.

Want to do this on your PC?

There are several free calendar programs available for your PC like Mozilla's "Sunbird" that will read .ics files. You can download and install "Sunbird" and subscribe in the same manner as with a Mac.
